

ME-VMS visitor management software with MyKad reader

ME-ACS access security software

Face recognition

Proximity card

QR code

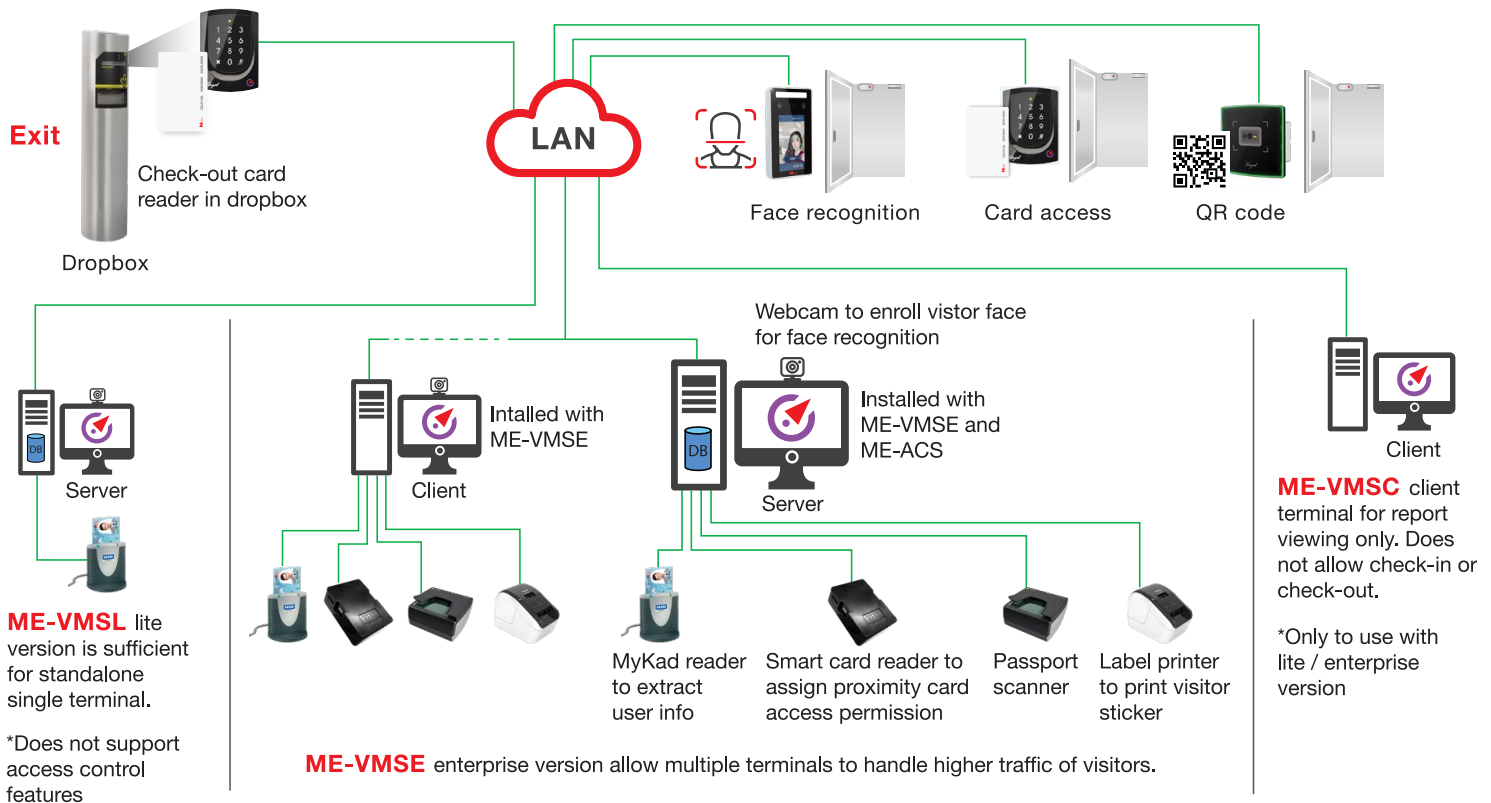

## Always know who is inside Visitor Management System

Entrance is the first level of protection against unwanted visitors. ME-VMS and ME-ACS helps you to verify, monitor, automate and improve the visitor recording process with extensive reporting.

### Benefits

- 1 Faster check-in with minimum typing**  
Visitor info is extracted automatically from the MyKad. With just a few clicks of a mouse without entering a lot of info, even a security guard can check-in the visitor.
- 2 Pleasant visitor experience**  
Multiple networked terminals can further reduce check-in time. Visitors just drop in their card on the way out to check out automatically. No more waiting in long queue.
- 3 Save money from buying cards**  
No more problems of visitors lost cards or forgot to return cards. You can use our face recognition or QR code to check- in and check-out visitors.
- 4 Better security**  
Verified visitor authenticity directly from MyKad. Integration with ME-ACS to further control visitor's door and lift accessibility permission. The black-listed visitor will be immediately alerted. CCTV auto picture captures all visitors as visual evidence.
- 5 It can save your life**  
During an emergency, ME-VMS indicates the number of visitors still trapped inside. Integration with ME-ACS will show their last door location to facilitate a rescue attempt.
