

Wing 201

Enjoy the convenience of automation

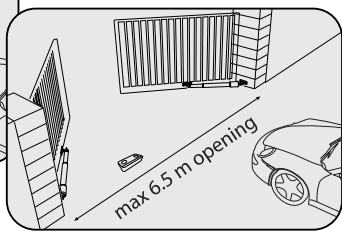

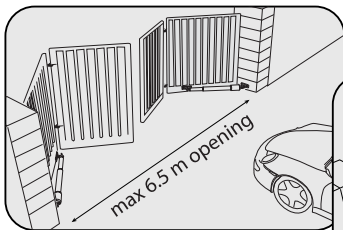

Wing Arm Autogate

Proudly Malaysian product. We have 40 years of expertise and continuously improving our system to give you proven quality, durability and reliability.

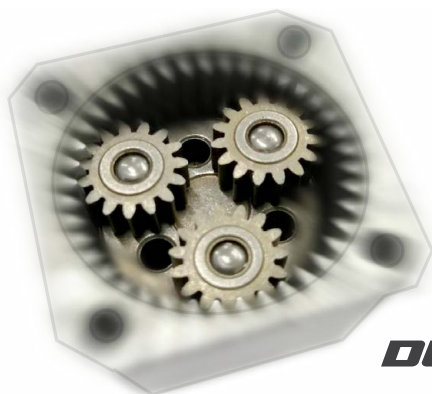

1 Higher security and safety

SpiralLock automatically self locks the gate after fully closed. No more hassle of an additional lock at the gate. Adjustable high speed allows the gate to be closed faster to prevent any intruder. Gate stops if blocked by an obstacle.

Folding type

Swing type

DURA GEAR

2 Pay lesser, work harder

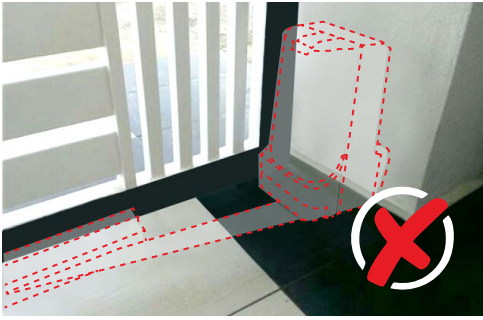

Simplified DuraGear design keep the price affordable while maintaining good quality performance.

SpiralLock

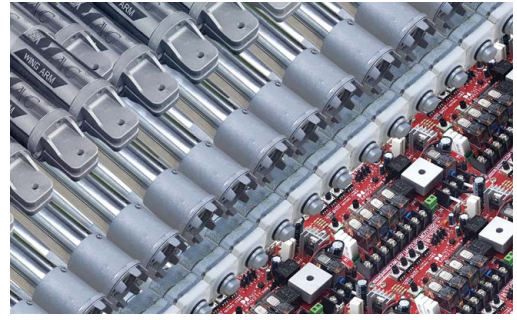

3 Work more seamlessly

MightyDC gear ratio is optimized for extra quiet operation. Our backup battery system ensures at least 50 times opening during power failure. No more big motor at pillar. Swing arm motor blends in nicely with the gate at bottom.

4 Faster spare parts

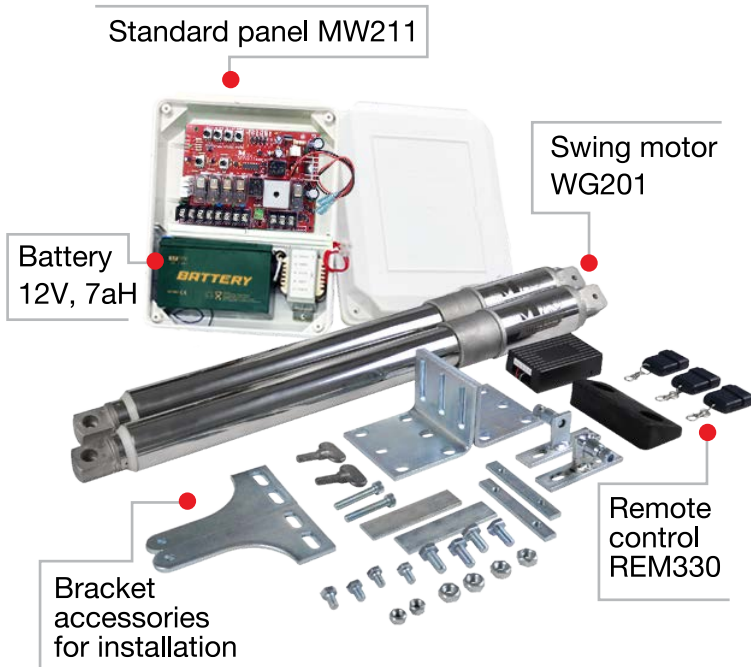

No more weeks of long waiting for imported parts. MAG full spare parts is available locally to get your gate fixed faster.

Feature

Select the one for you. We offer 3 types of systems to cater to your needs.

Model number	Wing201 	Wing303	Wing205
