

Wing 303

Wing Arm Autogate Stainless Steel Swing Gate Operator

MAG Wing is an electro-mechanical system for automatic swing gate. The design is carefully optimized to give every home a reliable and highly affordable solution. MAG Wing has unique self-locking feature built into the motor thus eliminating the need for additional gate lock. MAG Wing offer higher security with automation convenient at your fingertip.

1 Work harder and last longer

HeavyDC full metal gear high torque motor, heavy-duty bearing and more than 100 microns extra thick powder coating have proven to last for years to come. The dual-speed controller reduces mechanical wear thus reducing maintenance costs.

HEAVY DC

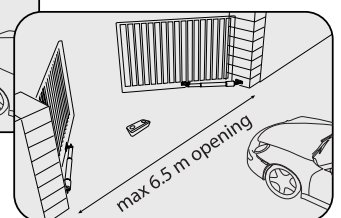

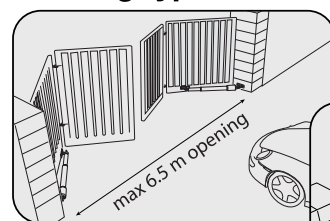

2 Higher security and safety

SelfLock automatically self locks the gate after fully closed. No more hassle of an additional lock at the gate. Adjustable high speed allows the gate to be closed faster to prevent any intruder. Gate stops if blocked by an obstacle.

SELFLOCK

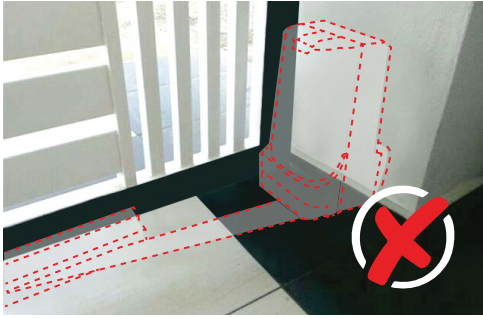

Folding type

3 Work more seamlessly

HeavyDC gear ratio is optimized for extra quiet operation. Our backup battery system ensures at least 50 times opening during power failure. No more big motor at pillar. Swing arm motor blends in nicely with the gate at bottom.

4 Faster spare parts

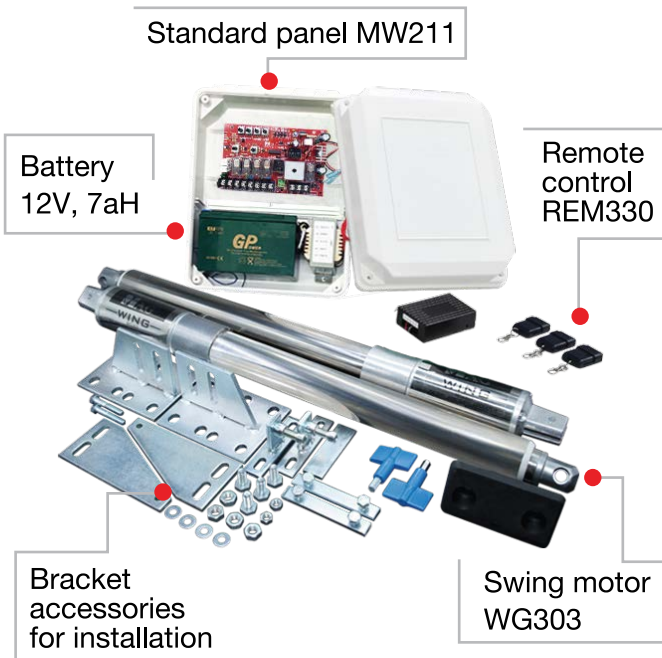

No more weeks of long waiting for imported parts. MAG full spare parts is available locally to get your gate fixed faster.

Feature

Select the one for you. We offer 3 types of systems to cater to your needs.

Model number	Wing303 	Wing205	Wing201
Types of swing motor	WG303	WG205	WG201
Specialty	Quiet and robust mechanism.	Stronger and extra quiet	Simplified to be more affordable.
Manual unlock with key	No	Yes with EcLoc	No
Max gate weight per leaf	250 kg	300 kg (MightyDC high torque)	220 kg
Arm motor finishing	Stainless steel	Powder coated above 100 microns	Stainless steel

Swing motor WG201

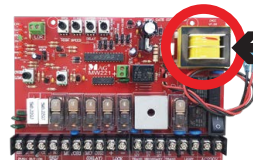

Swing motor WG205

UPGRADE from standard MW211 to MW221 premium control panel.

Premium control panel

Additional transformers minimize electric fluctuation for more stable performance at any site location.

UPGRADE

remote control from standard REM330 (30m) to long-range REM433 (60m).

REM433 - Long range

Accessories to add on

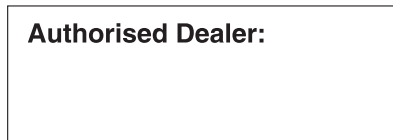

Double button - PB-2W

Rim lock for side gate
